Concurrent Technologies Corporation Selected as a Charter Member of the U.S. Environmental Protection Agency's National Environmental Achievement Track Program

Johnstown, PA, December 19, 2000 - Daniel R. DeVos, President & Chief Executive Officer of Concurrent Technologies Corporation (*CTC*) today announced that *CTC* has been selected as a Charter Member of the U.S. Environmental Protection Agency's (EPA's) National Environmental Achievement Track Program, recognizing *CTC* as one of the United States' top corporate environmental performers. The EPA recognized *CTC* for its commitment to attain levels of performance far beyond regulatory compliance, to the direct benefit of citizens, communities, and the environment.

The National Environmental Achievement Track Program recognizes and rewards American businesses for going beyond what the law requires to protect and improve the nation's environment. *CTC* was selected as a Charter Member in recognition of its sustained compliance with environmental regulations, public environmental outreach efforts, and commitments to continuous improvement in the areas of energy conservation and recycling. *CTC* is joined by an elite group of U.S. corporations from across the nation in being recognized for their environmental records of achievement. In acknowledgment of the superior environmental performance of these organizations, the EPA provides Charter Members with increased regulatory flexibility and reduced record keeping requirements.

CTC is an independent, nonprofit, applied research and development organization that provides management and technology-based solutions to a wide array of clients from state and federal governments as well as the private sector. In August of 1998, *CTC* was the first not-for-profit corporation in the United States to concurrently register to ISO 9001/14001 - the International Quality Management System Standard/Environmental Management System Standard. *CTC* also operates the National Defense Center for Environmental Excellence (NDCEE), which promotes environmental beneficial technologies throughout the national defense sector.

Established in 1988, *CTC* operates from more than 20 offices throughout the United States with a staff of over 1000 employees. Mr. DeVos added, "*CTC* has a distinguished record of environmental performance and is honored to receive this recognition as a Charter Member of the EPA's National Environmental Achievement Track."
