### **Concurrent Technologies Corporation Listed in *WashingtonTechnology* Magazine's Annual Ranking of "Top 100 Government Contractors"**

Johnstown, PA, May 23, 2008 – For the second consecutive year, Concurrent Technologies Corporation (CTC) has been listed in *WashingtonTechnology* magazine's ranking of Top 100 Government Contractors as reported in the May 12, 2008 issue.

Daniel R. DeVos, CTC's President and CEO said, "Our recognition in *WashingtonTechnology* is not only a tribute to CTC's growing national reputation but also a testament to the dedication of our employees who continually strive to meet the growing needs of our clients. We are pleased to once again be included in this prestigious Who's Who that is recognized and widely-read by key government and industry officials and professionals."

CTC is listed under the Professional Services industry sector. Additional sectors include Communications Equipment, Consulting, Defense, Engineering Services, Hardware, IT Services, Research, Satellite Communications, Systems Integration, Telecommunications, and Value-Added Reseller. Companies were evaluated on how they solve customers' problems, support critical missions, decrease costs, and provide technology-rich products and services to the federal government.

*WashingtonTechnology* is described as the national magazine for government contractors and focuses on the business of delivering technology and services to government, with an integrated media platform that serves the information needs of over 40,000 government contractors, systems integrators, resellers, value-added resellers, and IT service providers. The magazine's annual "Special Report – Top 100 Government Contractors" is its most read issue.

In determining this annual ranking, *WashingtonTechnology* utilizes information from the Federal Procurement Data System (FPDS). A total of 702 product service codes (PSCs) to represent technology-related contract actions are used. This year, the list was refined to remove construction-related work in order to focus on high-tech contracting and does not include contract actions from the Federal Aviation Agency, intelligence agencies, U.S. Postal Services, or other quasi-government agencies. It also does not include any subcontracting revenues.

Concurrent Technologies Corporation (CTC) is an independent, nonprofit, applied scientific research and development professional services organization providing innovative management and technology-based solutions to government and industry. Established in 1987, CTC operates from more than 50 locations with a staff of over 1,400 employees. As a nonprofit organization, CTC conducts impartial, in-depth scientific and technology-based assessments and delivers reliable, unbiased solutions that emphasize increased quality, enhanced effectiveness, and rapid technology transition and deployment. We offer a broad range of services and capabilities, coupled with real-world experience. CTC's core strengths are in the areas of advanced materials and manufacturing; energy and environmental sustainability; force readiness; and command, control, communications, computers, intelligence, surveillance, and reconnaissance (C4ISR).
